

IPND Learning Plan

Welcome to the **Intro to Programming Nanodegree (IPND)** program!

This week, you'll get oriented—and then start learning how to make your own Web pages using HTML and CSS.

Week 1

Time	Activity	Notes
20 min	Complete the Welcome! lesson.	Be sure to check these pages out: <ul style="list-style-type: none">• <i>Support and community</i>• <i>Calendar and deadlines</i>
2 hrs	Complete all pages through <i>Nested elements</i> in the Intro to HTML lesson.	Be sure to do all the practice exercises. Even if you totally understand a concept, it's still essential to practice it so the skill becomes automatic.
2 hrs	Complete all pages through <i>Images and relative URLs</i> in the Intro to HTML lesson.	Take the time to work on your <i>notes.html</i> file. This will take more time now, but it'll make the Lab at the end of the lesson easier!
2 hrs	Finish the Intro to HTML lesson and complete the Lab: Basic HTML Page .	When you pick up after a break, you may have forgotten some things. The <i>Practice</i> pages are a great way to refresh your memory!
2 hrs	Complete all pages through <i>Quotes or no quotes?</i> in the Styling with CSS lesson.	This lesson is a little more complex—be sure to do all the practice exercises!
2 hrs	Complete all pages through <i>Practice — Selectors</i> in the Styling with CSS lesson.	If you did all of this, you are off to an amazing start!

IPND Learning Plan

Welcome to Week 2! This week, you'll continue practicing your new CSS skills, and you'll get started on your first project.

Week 2

Time	Activity	Notes
2 hrs	Complete all pages through <i>Practice</i> — <i>Boxes inside boxes</i> in the Styling with CSS lesson.	You'll probably need to use Google (or your favorite search engine) a lot more in this lesson. Don't hesitate to look up a property if you forget it.
2 hrs	Complete all pages through <i>Practice</i> — <i>Fonts (2/2)</i> in the Styling with CSS lesson.	If you need to find something, but can't remember where it is, check out the Search feature in your classroom (at the top of the menu).
2 hrs	Finish the Styling with CSS lesson.	The last exercise (<i>Replicating a design</i>) is challenging! Don't let yourself get stuck—if you need to check out the solution, that's OK!
4 hrs	Get started on your first project: Animal Trading Cards!	If you get stuck, be sure to check out the <i>Support and community</i> page, back in the Welcome! lesson. And remember, it's OK to re-submit your project if it doesn't pass on the first try. Your reviewer will give you helpful tips about how to improve.
